- 12) Number of items shown on top of the cart symbol:
Guest user: Guest user should be only having number of cart items shown as 0
Logged in or Registered user:
- The number on top of the cart symbol on the navigation bar should reflect the number of items in the cart.
 - If the number of items have been modified in the cart page , the number has to change accordingly.
 - Once the user places the order, that number should be set back to 0.
- 13) Place Order:

Guest User: Has to login to place a order (This is how we designed and will further include privileges for guest user as a further improvement in functionality)

Registered user:

Scenario 1:

- Login as a registered user
- Add Items to cart
- Click on cart symbol, user now lands on cart page
- Click on Continue to Checkout
- User now lands on checkout page
- User can either click on edit order to manipulate cart item OR can enter all details
- Select 'Cash On delivery' for placing cash orders
- User upon successful place order (means all required form fields are filled) and place order button is clicked, will be eventually navigated to OrderConfirmation page with your order data being displayed
